

RECOMMENDATION

Based on the Hospital-Acquired CAUTI Rates and Closed System Foley Catheter Usage graphs, which typically reflects Pre- and Post- program data from your facility, we have calculated an estimate on your total Program savings.

- **Recommendation:** Congratulations! Your data has provided a measurement on the effectiveness of the program and an estimate on your facility's cost savings, indicating the savings realized from converting to the ERASE CAUTI Program. We hope you will share this cost savings with your Leadership Team to further validate your decision to convert.
- **Deliverable:** If you would need any further assistance with the program, please contact your Program Manager, Lisa Marsek.
