

Colour-Coded Packaging System

Surgical Supply Management Solutions

Perioperative Management

**Saves time
and improves
efficiency**

Pulling the wrong surgical pack costs your facility more than resources.

When your OR is moving quickly, picking errors are bound to happen. And when they do, professionals might lose focus, resources are wasted and productivity suffers.

Stop the confusion, save valuable time and ensure patient safety. Discover the Colour-Coded Packaging System from Medline. From colour-coded labels to high-legibility inserts, this is intuitive visual design at its best: fast, at-a-glance picking for accurate, off-the-shelf access to the right pack for the right procedure.

No more guessing. Just results.
Colour coding saves time and improves efficiency.

Empower Your Team with Colour-Coded Confidence.

Our Colour-Coded Packaging System transforms the way surgical packs are stocked and pulled, improving OR efficiencies and shaving minutes off valuable prep time.

Check out our easy-to-scan insert design:

1. Choice of colour and bold labeling make it simple to identify pack-type
2. Alphabetical contents list verifies what's inside before opening pack
3. Add your hospital logo to customize design
4. Expiration date is clearly indicated to ensure patient safety
5. Latex content is noted in red to help prevent accidental exposure
6. Component Utilization tool documents unused items that may be eliminated from the pack and/or any additional items that should be included
7. Any item not included is noted in black so you'll know what items you need to pick separately

Pack: _____

3 IMPROVE EFFICIENCIES

6b

1 PREPROCEDURE REVIEW: check to ensure quality.

- Correct pack for procedure
- Packaging intact
- Check expiration dated items
- Are latex free items required

Items highlighted in red contain latex.

*R Items w/ "R" are not included in pack. Please pull the sterile equivalent.

Brilliant Organization. Big Results.

Put the Colour-Coded Packaging System* to work for your team.

- **Increase** the ease and efficiency of stocking and pulling
- **Prevent** the hassle and expense of picking the wrong pack
- **Reduce** the risk of accidental latex exposure
- **Support** lean OR objectives
- **Improve** productivity and room turnover times
- **Keep** everyone focused on the procedure at hand

*Patent pending

Fast 5: Answers To Your Questions.

1. Why do I need the Medline Colour-Coded Packaging System?

This simple colour-coded system transforms the way surgical packs are organized for faster, more efficient pulling and stocking. It's cost effective, saves time, reduces picking errors and helps keep patients and staff safe.

2. What makes it so unique?

The Medline Colour-Coded Packaging System is intuitive visual design at its best. Simple and efficient, your surgical packs will stay organized for fast, accurate pulling every time.

3. How do I train my team to use colour-coded packaging?

We'll show your team how easy it is to use the system—from colour-coded pack labels to inserts and shelf liners.

4. How do I coordinate my surgical packs by colour?

Our colour-coded system includes 24 unique colours so you can colour code your surgical packs by service or by pack. Contact your Medline Representative for help selecting colours using our online pack management tool MedPack.

5. Can Medline colour code my custom pack shelving?

Yes. Beyond colour coding your packs, we also provide colour-coded signage for pack shelving. The benefit: it's another visual indicator to help your staff stock and pick cases more accurately in less time.
