

WORKFLOW OPTIMIZATION

We simplify operations, you focus on patient care

Managing a clinic is more challenging than ever. We help you improve patient care and your clinic operations in four critical areas:

Workflow Optimization

Delivery and installation

Our teams can deliver right to your clinic door, assemble, install and train staff on equipment, as well as removing debris and packaging. Whatever you need, we're at your service.

Space planning and design

Our experts work closely with you to find the perfect options for your unique clinic. We offer room-by-room design planning, leveraging evidence-based design and our understanding of trends to bring your vision to life.

Standardization

Consistent clinic design and standardized product lists improve efficiency and enhance patient and staff experience.

Proprietary tools

Clinic Ordering Templates designed from decades of experience and expertise. Lists designed from years of experience save you time and frustration.

“Medline was really crucial in helping us to understand how we should lay out the rooms to increase efficiency and enhance the patient experience and patient flow.”

Tim Dinger
President, Rejuvenation Medical Group
Edmonton, Alberta
